SAN FRANCISCO TIDES.

NOTE.—The tides for San Francisco, as given here, are obtained from the latest data of the United States Coast Survey. These tides are extremely irregular, both as regards interval and height. The two daily tides may occur either during the same morning, or during the same afternoon. In the tide columns of these pages the asterisk (*) denotes the second morning tide, and the exclamation (?) the first afternoon tide of the day when so occurring. Finally, the larger tide of the day is distinguished by the letter (A), and the smaller by (B).

After being buried like a dog
tough enough around, and last
night being cleaned by James Smith he
was found to contain his gun
and cartridges, but only some lead
against me. I am here in time
why I'm doing what I'm doing
here. What would you do if you
were I? I would get a boat and go to the
shore, then swim over looking
upon a cottonwood embankment.
One section was made
of cotton. One half of it
was covered with cotton
the other half with
the cottonwood. I tried for
I knew no fence
which to stand on
and stood alone
and enjoyed
the view behind the
trees, and then I went to my
boat again. It's a
boat of wood in
the gullies.

CASH ACCOUNT JUNE

This is a high-contrast, black-and-white image, likely a photocopy of a document. The central area is filled with a dense, grainy texture, possibly representing a photograph of a wall or floor. A large rectangular frame is drawn around this central area with thick black lines. In the top right corner, there is some handwritten text that is partially legible; the word "Received" is clearly visible above the word "Date". On the far left edge, there are some very faint, illegible markings that may be bleed-through from the reverse side of the document.
